

## The Doggie Bag.

This is about 5” in diameter, 7.5” tall and about 20” in circumference (when full!). It will easily hold a grocery bag full of dog leavings and it has a shoulder strap for hands-free carrying. But wait – there’s more! It also has a secret weapon!

**Inside Bottom**

That’s not just a piece of cardboard you see here, that’s our patented smell-well component. All right – it’s *two* pieces of cardboard with a dryer sheet sandwiched between them. It gives the bag a little more shape and it helps it smell nicer :)

### **Dryer Sheet Sandwich**

If you don't have a dog and don't need a ka-ka carrier, you could use this for a lunch bag – but you should probably leave out the dryer sheet :)

Bind off loosely.

Make a tie in whatever style and of whatever material you like. Thread it through the eyelets starting with the first eyelet after a cable by inserting the tie from the front. Doing it this way will keep the cables from being covered up.

Measure the bottom of the bag. Mine came to about 4.5" x 4.5". Cut two squares of cardboard *just a hair* bigger than that. Snip a dryer sheet so that it fits nicely between the two pieces without sticking out anywhere. Place it between the cardboard pieces and fit this into the bottom of your bag.
